Ultra-sized yet none the less foldable Loom Crafts fabric structures offer considerably more than just dependable sheltering from sun, rain, or just chill weather: World-wide, they are unrivalled in their architectural design and their aesthetic visual appearance. Loom Crafts fabric structures are renowned for setting architectural accents in creating outdoor islands of ease and comfort. In particular it's the variety of different-shape & -size models from the self-reliant Loom Crafts 'Jumbo' production line that is considered worldwide as the most finished and exacting outdoor sheltering culture by market insiders. What are the reasons? – The quite simple answer is: Ever since, Loom Crafts structures have been the most solid, most elegant, and the most long lived ultra-sized "anti-wind" parasols that one can buy for money. They are proudly being "Made in India", now as ever.

JUMBO SINGLE-VOLA UMBRELLA

JUMBO MULTI-VOLA UMBRELLA

Our Jumbo Umbrellas are also available in our Patented Multivola Wind resistant design. These umbrellas are specially designed for places with high wind pressures which let them stand strong due to its unique Multi Layered Design.

JUMBO GIANT CENTER-POLE UMBRELLA

In the beginning, there wasn't but the vision of an ultra-sized yet ready-to-erect foldable fabric structure that was to become perfect in every respect. Its aesthetic architecture, its modular producibility, and its resulting value for-the-money price level had been in the limelight. Eventually, the evolutionary realization of that very vision ended up with the variety of models, sizes, editions, and options offered from the Loom Crafts 'Jumbo' line nowadays.

A unique shade umbrella developed with the most convenient and easy opening and closing system, ever to be found in any other umbrella in the world.

Large size umbrellas are available with side glass wind breakers.

Now you can cover your restaurants with large size umbrellas, instead of having many small umbrellas, you can have one or more large umbrellas to cover the entire area, this will avoid too many umbrella poles and bases in the area, all the large umbrellas can be joined together with rain water gutters.

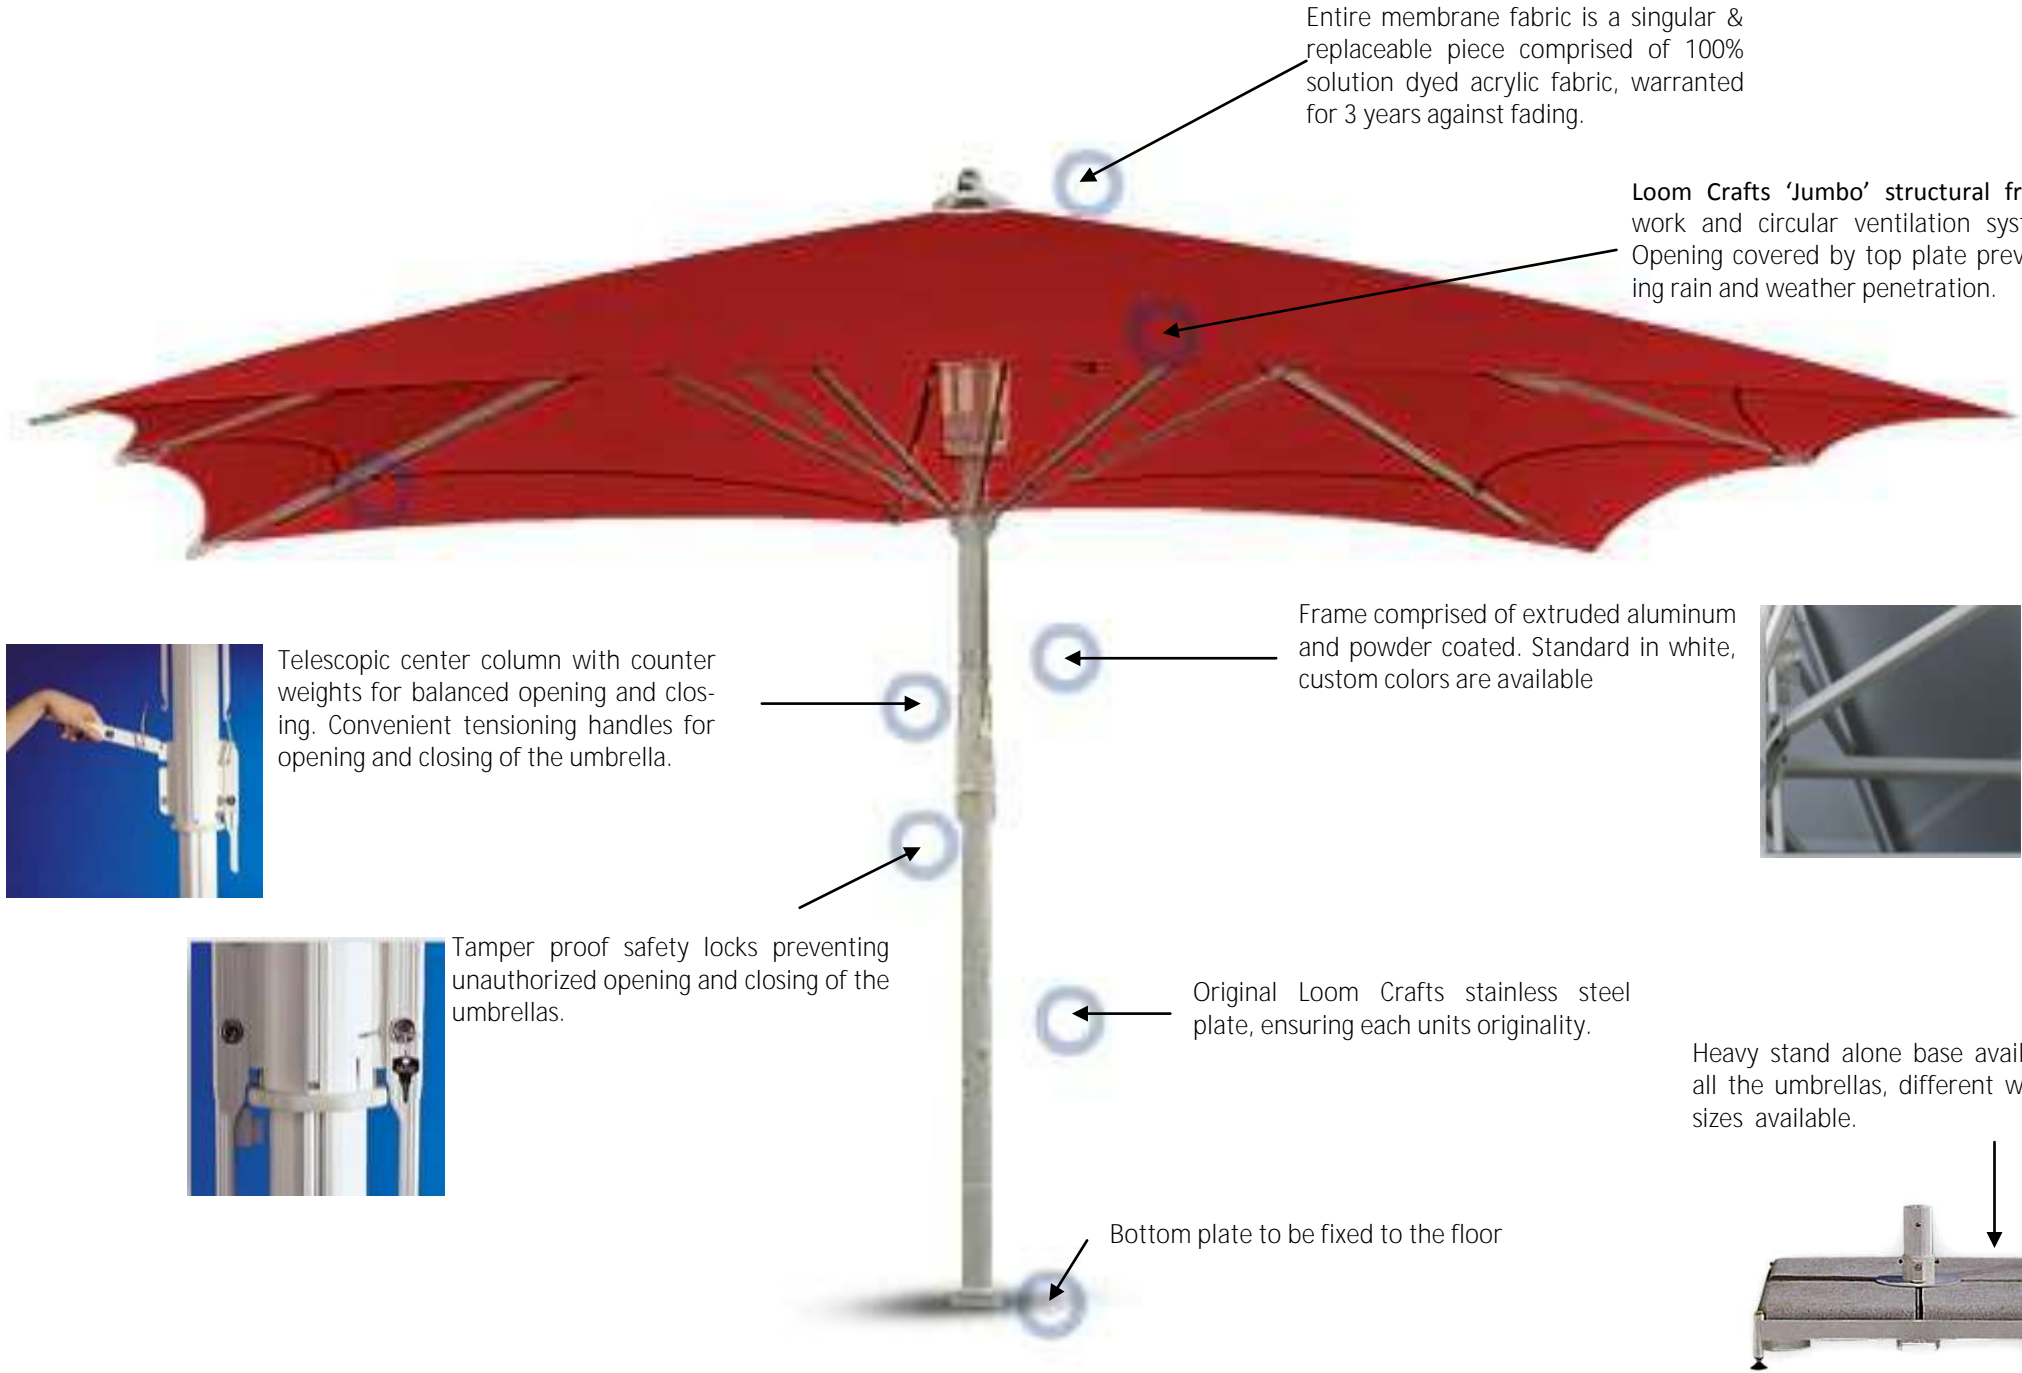

Jumbo umbrellas joint together with gutters

Side Glazing with sliding doors & windows

Loom Crafts 'Jumbo' umbrellas can be joint together in many configurations with rain water gutters, we can also provide and fix side glazing of aluminum frames with glass sliding doors and windows as shown in the above picture, with this system we can create a hall for your business which can also be air conditioned, Our 'Jumbo' umbrellas have been specifically designed for this purpose to provide very economical shade systems for the outdoor restaurants, cafes, etc.

THE JUMBO CENTER-POLE MECHANISM

Entire membrane fabric is a singular & replaceable piece comprised of 100% solution dyed acrylic fabric, warranted for 3 years against fading.

Loom Crafts 'Jumbo' structural frame work and circular ventilation system. Opening covered by top plate preventing rain and weather penetration.

Frame comprised of extruded aluminum and powder coated. Standard in white, custom colors are available

Telescopic center column with counter weights for balanced opening and closing. Convenient tensioning handles for opening and closing of the umbrella.

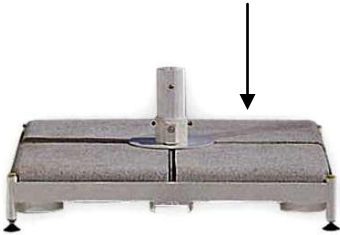

Tamper proof safety locks preventing unauthorized opening and closing of the umbrellas.

Original Loom Crafts stainless steel plate, ensuring each units originality.

Bottom plate to be fixed to the floor

Heavy stand alone base available with all the umbrellas, different weight and sizes available.

## THE JUMBO CENTER-POLE MECHANISM

Swift two-stage tensioning procedure, Primary tensioning latch already engaged & locked, secondary after-tensioning latch in transit yet. To refold the structure reverse the order of the procedure.

Picture showing the structure in its readily unfolded & tensioned configuration with the latches properly locked except that the master key must be pulled off yet to prevent the parasol from being handled by unauthorized hands.

The umbrella in folded position with the heavy steel base fitted on the bottom, the right side picture shows the canvas cover on the umbrella, when not in use the umbrellas can be covered.

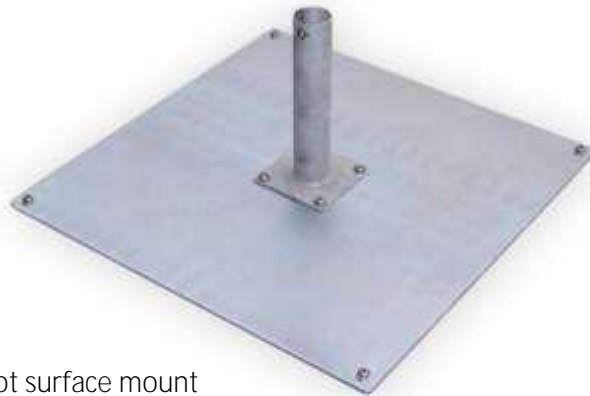

## UMBRELLA BASE

Universal portable base, with marble stone weight inserts, and levelers.

Heavy duty flat foot surface mount

In ground footing console

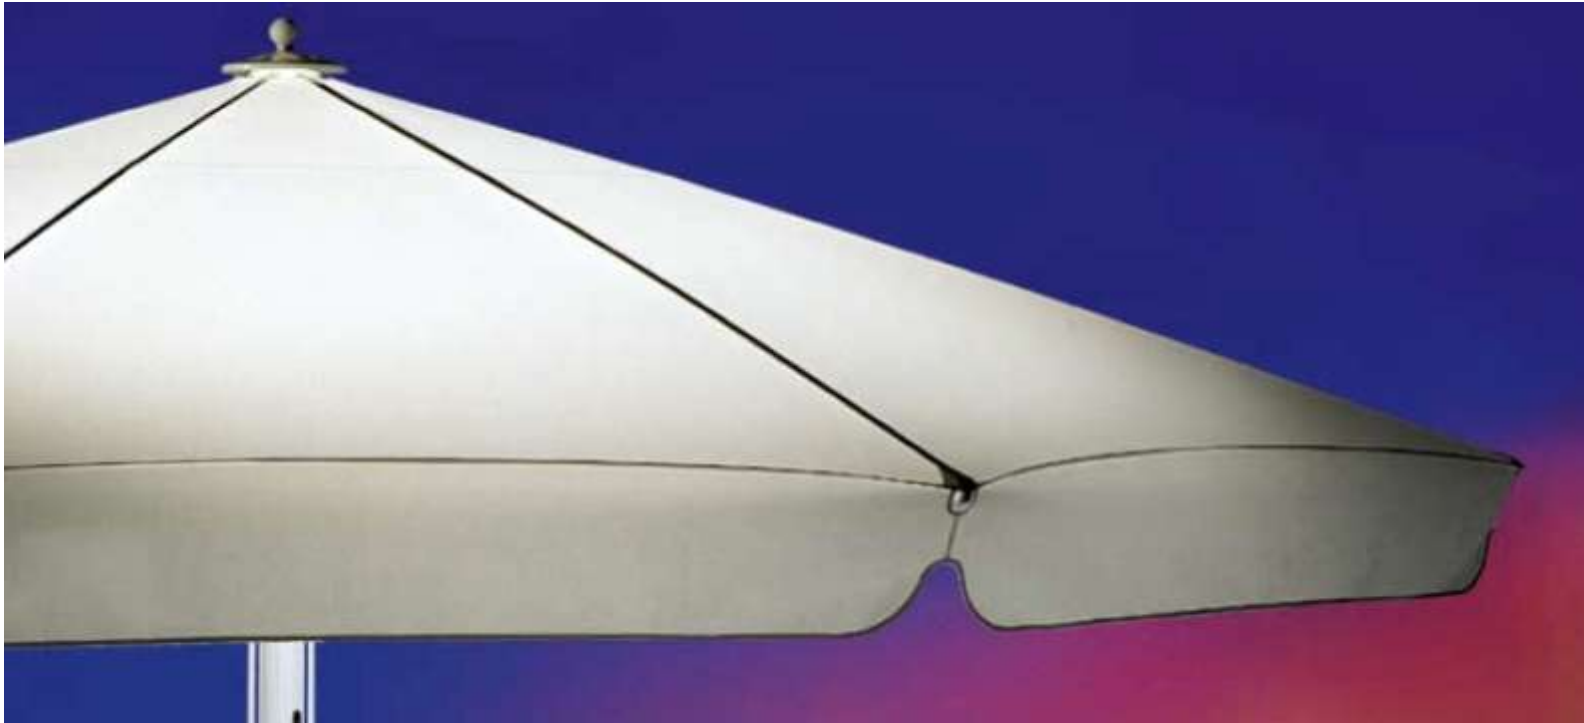

Joining of umbrellas with rain water gutters, we can join the umbrella with the rain water gutters, you can place the umbrellas side by side and join them together

STYLE YOUR LIFESTYLE

## Side Pole Jumbo Umbrella

Our Side Pole Jumbo Umbrella is a robust fixed height side-arm umbrella - **12' up to 20' square, round or rectangular.**

Structures are aluminium and are available in wide variety of colors for the frames and fabric.

Our canopies are made from PVC coated 100% polyester fabric, Teflon coated, 100% water-resistant, material and available in 2 colors— Off White & Beige.

The base can either be a fixed tube concreted into the ground (and included in our price) or a movable tray weighted by four shaped stones.

The operating mechanism is a simple handle operated 'winch' which opens the canopy. The umbrella can also rotate 360 degrees.
